-  golf
-  tennis
-  multisport

Key Features

Customized Options

Elegance

- Steam-pleating gives the curtain an exceptional elegance and sophistication
- A stylish alternative as the pleats are permanently created by steam which eliminates stitching
- No risk of puckering due to thread tension or gathering during washing as the seams are not sewn

Any Fabric

- We maintain over 3'000 curtain fabrics in various colors, patterns and qualities on stock
- Therefore, we can offer an extensive selection with very short delivery times
- Moreover, we produce customized curtain fabrics exactly according to your design, color and other specifications

Convenience

- Thanks to the symmetry of the pleats, the curtain can be swiftly opened and closed whilst occupying very little space when not in use

Product Variants

- Lightweight single-layer curtains
- Premium double-layer curtains
- Multiple-layer curtains incorporating an interlining for sound-absorbing and light-blocking properties

Easy Cleaning & Care

- The curtains can be washed or dry cleaned and will maintain their shape since the pleats are a permanent feature, thus ensuring excellent appearance throughout service-life

Dimensions

- Any sizes and dimensions
- Various pleat widths

Ready-to-install

- Our craftsmen produce high quality steam-pleated curtains which includes glider and hook fixings
- The curtains are ready-to-install for an enduring compliment to your furnishings

Fixing System

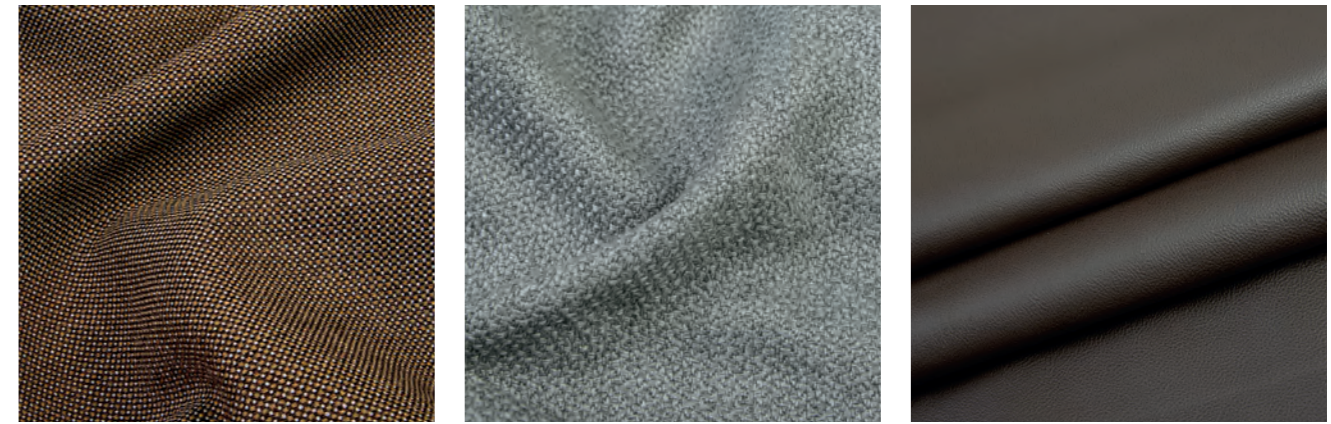

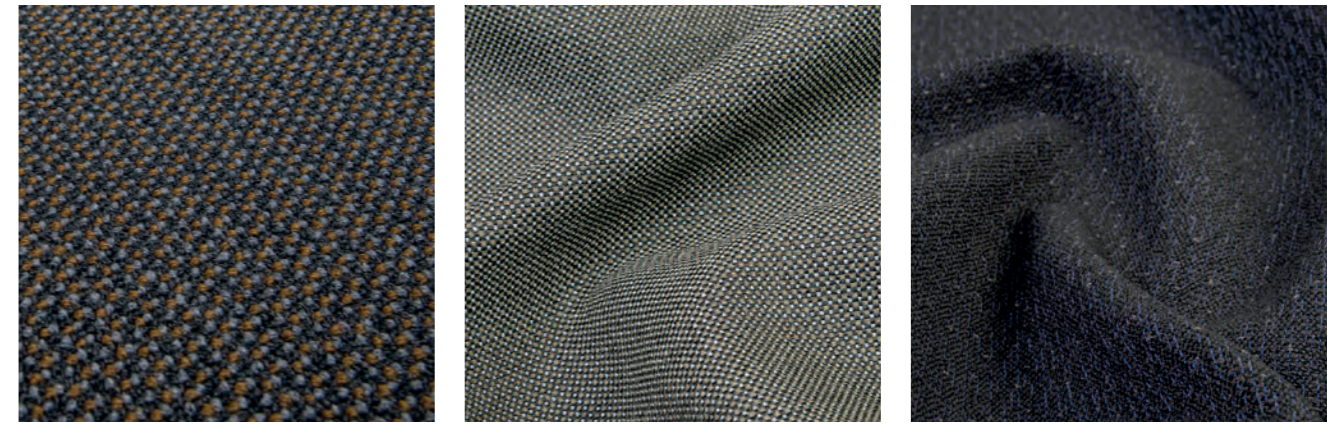

- Various glider and hook systems for easy installation

One stop shopping

As a true all-inclusive manufacturer, Tisca offers co-ordinating carpets and seat cover fabrics alongside our steam-pleated curtains. All materials are designed, developed and manufactured under one roof.

Made in Switzerland.

Tisca is the only company in the world to control every aspect of such curtain production. Firstly weaving numerous fabrics styles, then processing in a pressurised chamber which results in a steam-pleated, ready-to-install curtain. All activities are conducted in-house without the need of subcontracting. This delivers significant cost savings and time benefits for our customers.

The Tisca logo is positioned in the top right corner of the image. It features a vertical bar to the left of the word "TISCA", which is rendered in a bold, white, sans-serif font. The background of the entire image is a photograph of a window with blue pleated curtains on the left and white vertical blinds on the right. A portion of a patterned sofa is visible at the bottom, and a circular light fixture is partially seen on the far left edge.
